Primary and Secondary Education During Covid-19

2021-09-14 Fernando M. Reimers This open access edited volume is a comparative effort to discern the short-term educational impact of the covid-19 pandemic on students, teachers and systems in Brazil, Chile, Finland, Japan, Mexico, Norway, Portugal, Russia, Singapore, Spain, South Africa, the United Kingdom and the United States. One of the first academic comparative studies of the educational impact of the pandemic, the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning, especially for disadvantaged students. Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education. For students, as well as for teachers and school staff, these included the economic shocks experienced by families, in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health. Opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus, and by the constraints on learning resulting from students having to learn at home, where the demands of schoolwork had to be negotiated with other family necessities, often sharing limited space. Furthermore, the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives, created a traumatic context for many that undermined the necessary focus and dedication to schoolwork. These individual effects were reinforced by community effects, particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive. This is an open access book.

Metal Recycling

2013 Metal recycling is a complex business that is becoming increasingly difficult! Recycling started long ago, when people realized that it was more resource- and cost-efficient than just throwing away the resources and starting all over again. In this report, we discuss how to increase metal-recycling rates - and thus resource efficiency - from both quantity and quality viewpoints. The discussion is based on data about recycling input, and the technological infrastructure and worldwide economic realities of recycling. Decision-makers set increasingly ambitious targets for recycling, but far too much valuable metal today is lost because of the imperfect collection of end-of-life (EoL) products, improper practices, or structural deficiencies within the recycling chain, which hinder achieving our goals of high resource efficiency and resource security, and of better recycling rates.

Dr. Jekyll & Mr Hyde

2014 Francis Gilbert "Clearly Francis Gilbert is a gifted and charismatic teacher," Philip Pullman, author of 'Northern Lights'. Are you struggling to understand Robert Louis Stevenson's classic novel 'Dr Jekyll and Mr Hyde'? Or are you an English teacher wanting ready-made exercises and guidance to help you teach this difficult text? Do your students need support to understand the language properly and work independently on the book? This brilliant edition of Stevenson's novel may be the answer to your prayers. Written by an experienced teacher and best-selling author, this version is aimed at students who must analyse the text in depth or teachers wanting to deliver outstanding lessons on it. This book contains an annotated complete text, numerous essays on the novel, including detailed accounts of Robert Louis Stevenson's life, relevant contexts and discussion of vital themes and imagery. The complex vocabulary of the book is analysed throughout, and simple explanations of what is happening punctuate each chapter. Furthermore, there are academic explorations of the issues as well as comprehensive question and answer sections at the end of each chapter, including a "fill-in-the-blanks" summary to check understanding. At the end of the guide, there is advice on how to write successful essays and assignments. There are also plenty of pointers to help students develop their own personal responses, including thought-provoking thematic questions, links to the author's YouTube readings and explanations, and creative response tasks.

Renewable Energy Sources and Climate Change Mitigation

2011-11-21 Ottmar Edenhofer This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies, and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector, and academic researchers.

Managing the Curriculum

2001-04-28 David Middlewood `Each chapter in the book is firmly rooted in research and is well referenced as one would expect of such a book. It will be of particular use to people with an academic interest in this aspect of school management but will also be thought-provoking for those who are involved in the development of the curriculum within their institution' - escalate This book explores many of the new aspects of the core business of schools and colleges, that is, the curriculum. Keeping the focus clearly on learning and teaching, the contributors explore the practical issues for managers at institutional level, within the context of their need to understand and analyze key educational values and principles. Part One presents overviews of theories and models of curriculum, while Part Two examines how these are applied through planning, monitoring and evaluating. Part Three explores in detail the various managerial roles within schools and colleges from leaders to those responsible for cross-curriculum work and

special educational needs. The fourth part discusses the importance of effectively managing resources for the curriculum - the environment, support staff and finance. Contributors use empirical research evidence to analyze current curriculum trends whilst proposing various new models which are likely to emerge in the 21st century.

Environment and Tourism

2000 Andrew Holden For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: * how the economics of tourism can be adopted in a positive way to aid conservation * whether the concept of sustainability can be applied to tourism * provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates.

Nothing but the Truth

2002-01-01 John Kani An award-winning play about the relationship between brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

Ecosystems and Human Well-being

2003 Joseph Alcamo Ecosystems and Human Well-Being is the first product of the Millennium Ecosystem Assessment, a four-year international work program designed to meet the needs of decisionmakers for scientific information on the links between ecosystem change and human well-being. The book offers an overview of the project, describing the conceptual framework that is being used, defining its scope, and providing a baseline of understanding that all participants need to move forward. The Millennium Assessment focuses on how humans have altered ecosystems, and how changes in ecosystem services have affected human well-being, how ecosystem changes may affect people in future decades, and what types of responses can be adopted at local, national, or global scales to improve ecosystem management and thereby contribute to human well-being and poverty alleviation. The program was launched by United National Secretary-General Kofi Annan in June 2001, and the primary assessment reports will be released by Island Press in 2005. Leading scientists from more than 100 nations are conducting the assessment, which can aid countries, regions, or companies by: providing a clear, scientific picture of the current sta

A scholarly inquiry into disciplinary practices in educational institutions

2019-12-12 Connie B. Zulu This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.

Environmental Learning

2009-09-18 Mark Rickinson Environmental education and education for sustainable development have become features of many countries' formal education systems. To date, however, there have been few attempts to explore what such learning looks and feels like from the perspective of the learners. Based on in-depth empirical studies in school and university classrooms, this book presents rich insights into the complexities and dynamics of students' environmental learning. The authors show how careful analysis of students' environmental learning experiences can provide powerful pointers for future practice, policy and research. Environmental Learning will be a key resource for educators, teacher educators, decision-makers and researchers involved in education and sustainable development.

The Water Footprint Assessment Manual

2012-08-21 Maite M. Aldaya People use lots of water for drinking, cooking and washing, but significantly more for producing things such as food, paper and cotton clothes. The water footprint is an indicator of water use that looks at both direct and indirect water use of a consumer or producer. Indirect use refers to the 'virtual water' embedded in tradable goods and commodities, such as cereals, sugar or cotton. The water footprint of an

individual, community or business is defined as the total volume of freshwater that is used to produce the goods and services consumed by the individual or community or produced by the business. This book offers a complete and up-to-date overview of the global standard on water footprint assessment as developed by the Water Footprint Network. More specifically it:

- o Provides a comprehensive set of methods for water footprint assessment
- o Shows how water footprints can be calculated for individual processes and products, as well as for consumers, nations and businesses
- o Contains detailed worked examples of how to calculate green, blue and grey water footprints
- o Describes how to assess the sustainability of the aggregated water footprint within a river basin or the water footprint of a specific product
- o Includes an extensive library of possible measures that can contribute to water footprint reduction

Study Guide for Hamlet

2010-10-29 Patience DeMasi Ignatius Critical Editions (ICE) Study Guides are constructed to aid the reader of ICE classics to achieve a level of critical and literary appreciation befitting the works themselves. They give introductions and summaries, followed up with in-depth considerations of key critical moments and themes, plus lists of points to ponder while reading. Finally, they include questions to test the students' knowledge of the text and ability to go from that knowledge to wider or higher conclusions about the works and their relation to reality. Ideally suited for students themselves and as a guide for teachers, the ICE Study Guides serve as a complement to the treasures of critical appreciation already included in ICE titles.

At Risk

2014-01-21 Piers Blaikie The term 'natural disaster' is often used to refer to natural events such as earthquakes, hurricanes or floods. However, the phrase 'natural disaster' suggests an uncritical acceptance of a deeply engrained ideological and cultural myth. At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed. The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration, but as a signal failure of mainstream 'development'. Two analytical models are provided as tools for understanding vulnerability. One links remote and distant 'root causes' to 'unsafe conditions' in a 'progression of vulnerability'. The other uses the concepts of 'access' and 'livelihood' to understand why some households are more vulnerable than others. Examining key natural events and incorporating strategies to create a safer world, this revised edition is an important resource for those involved in the fields of environment and development studies.

Biology Education for Social and Sustainable Development

2012-10-20 Mijung Kim In an era of globalization and urbanization, various social, economic, and environmental challenges surround advances in modern biological sciences. Considering how biological knowledge and practice are intrinsically related to building a sustainable relationship between nature and human society, the roles of biology education need to be rethought to respond to issues and changes to life in this biocentury. This book is a compilation of selected papers from the Twenty Third Biennial Conference of the Asian Association for Biology Education 2010. The title, Biology Education for Social and Sustainable Development, demonstrates how rethinking and reconstruction of biology education in the Asia-Pacific region are increasingly grounded in deep understandings of what counts as valuable local knowledge, practices, culture, and ideologies for national and global issues, and education for sustainable development. The 42 papers by eminent science educators from Australia, China, Philippines, Singapore, Taiwan, and the U.S., represent a diversity of views, understandings, and practices in biology education for sustainable development from school to university in diverse education systems and social-cultural settings in the Asia-Pacific region and beyond. The book is an invaluable resource and essential reference for researchers and educators on Asian perspectives and practices on biology education for social and sustainable development.

Discovery Wced Past Papers Grade 11 File Type Pdf Pdf, Acupuncture For All Those Simple Aches And Pains

If, like me, you have quite a fear of needles and injections, then acupuncture, that practice of sticking needles onto different parts of your body to cure sicknesses might seem scary at first.

However, if you've been long been suffering from some problems like headaches or chronic pains and your regular visits to the doctor don't seem to be helping you, then why not consider a trip to an acupuncture specialist? After all, who hasn't heard of somebody's aunt somewhere suffering from arthritis and trying out everything that the doctors recommended all to no avail, only to finally be cured by a really good acupuncturist?

Perhaps you were wondering if it could actually work for you. You might feel a bit skeptical since traditional Chinese medicine doesn't immediately coincide with theories in modern Western medicine. In fact, the use of needles to cure people was discovered thousands of years ago in China long before microscopes or x-ray machines were invented or before bacteria and germs were discovered.

Adopting a small dog can be done through several different avenues. Shelters are a good source for finding small dogs to adopt, both pure breed and mixed breeds alike. The process is rather simple and generally requires an adoption fee and sometimes a pet owner check. This helps them to know what kind of pet owner you have been in the past. It is always a good idea to spend time with the dog before you adopt it. If you have children you should bring them along for the first orientation.

Some small dog breeds have breed specific medical conditions. For instance Dausounds of regular or miniature variety are more prone to back and hip problems. Some simple breed research will reveal most of these medical issues.

Another avenue for small dog adoption would be rescues. Some of the more popular breeds such as, bichon frise, Papillion, miniature pincher, dashound, Yorkshire, pug, Boston terrier ect.. Have breed specific rescues. Other rescues are more general and have mixed breeds as well. If after you have finished your research, you found that particular breed fits you better, this avenue would probably work best for you.

Legend Wced Past Papers Grade 11 File Type Pdf Pdf

The action is just as crazy on the beach as it is off it, with local clubs cranking up the groove all day and all night long. The northwestern wing

of Florida that extends along the Gulf Coast is aptly dubbed as the "Panhandle of Florida". The type of weather is a bit colder than the southern parts of Florida still it offers milder winters, sizzling summers and pleasantly enjoyable spring and fall weather. Its beaches are superb with temperate shallow waters and excellent white sand.

The most excellent instance to stopover Panama City Florida is between May and October. All through the winter months, it turns a bit nippy for swimming and sunbathing, but is all right for golfers, tennis players, bikers and other outdoors people and their activities. From the middle of March all the way through mid April, more than a few hundred thousands of college students from all around the USA go down on Panama City Beach for their Spring Break activities.

This is a grand occasion to stay in the locale if you are looking for feral parties and a young throng. On the other hand, if you are in search of a serene retreat, you may fancy keeping away from Panama City Beach at that time.

Legend Wced Past Papers Grade 11 File Type Pdf Pdf

The experience of touring an air ambulance may also allow the opportunity for the children to meet the flight crew and medical staff. Getting to know community heroes is an excellent experience for children. Teachers can use this opportunity for children to write a letter to the crew or other heroes in the local community. Older children may find the experience intriguing and be interested in learning more about volunteering or becoming an EMT. Grasping a child's natural curiosity could lead to a career in the medical field or as a pilot in the years to come.

If your community has not set up an opportunity to tour an air ambulance, then consider checking into this as a project through school, Scouts, or other organizations.

For older children, it may be possible to schedule a chance to ride in the air ambulance as an observer. High school students interested in a medical career may relish the opportunity to job shadow in this position.

Guide Wced Past Papers Grade 11 File Type Pdf Pdf, For those who want to go swimming, don't forget your bathing suit so you can jump in anytime into the water especially when you just want to cool off. If there is some space in your bag, perhaps you can also pack in some snorkeling gear as some will rent this to you for a fee.

All of this should be placed in a 10 kilogram bag which is preferably collapsible because of the limited storage space on board most ships. This will also allow other passengers to stow their gear.

You don't have to bring your cellular phone with you because in the event that something should happen on board, they have a satellite phone and a radio so rescue can be called in. You also don't need to bring a first aid kit since this is also available on the ship.

Study Wced Past Papers Grade 11 File Type Pdf Pdf, There is often a trap in the words after school activities. One may easily believe that since these activities are after school, they are not of much importance. But, one couldn't be more wrong. Research suggests that children pick up some of their most important skills from after school programs. That is why children who do not participate in any extra curricular activities are generally slow and less vibrant.

The learning environment that one fosters in after school activities must be as disciplined and as functional as that found in the school. This is especially true of educational after school programs. This is the best place to teach the child important skills like time-management and goal setting. Time-management is a vital skill, but it is not achieved easily. Children need to feel the discipline that is needed to finish a task and the happiness of finishing the allotted work in a specific time frame.

Children look for different things in an after class program. The learning environment should be attractive, colorful and informative. Use charts, pictures, posters and drawings to liven up a class. Additional resources (resources that are not easily available in the school) will make the classes interesting. For instance, when teaching a biology lesson, allow the child to see through a microscope or see slides of bacteria. This will add to his knowledge and also make him more enthusiastic about his after school program.

Concepts Wced Past Papers Grade 11 File Type Pdf Pdf

Aside from the usual reasons for which one would choose to adopt, there are a couple of reasons why international adoption specifically may be a preference. One reason can be benevolence. The major countries from which children are adopted into the United States all have glaring social problems which drive the international adoption process. China, for example, has strict population control laws which often force Chinese parents to give their children (especially girls) up for adoption. Russia suffers from poverty to such an extent that raising a child is often not feasible. Americans who adopt children from these environments and others like them may decide that they wish to rescue a child from such circumstances and bring him or her into the home.

A second-- and perhaps more substantial-- reason for international adoption is the decline in availability of children for adoption in the United States. The number of adoptions which were conducted transnationally has more than tripled in the last 15 years, due largely to a decrease in potential adoptees available domestically.

The potential benefits to the adopted child are fairly obvious. She is raised in a nurturing home by people who wanted the child so badly that they went to great lengths and expense to adopt her. In nearly all cases, the child moves up in socioeconomic class after being adopted. The child may also experience educational opportunities which may not have otherwise been available. While these benefits may be obvious, there are more complex and perhaps more obscure impacts on the societies and cultures involved at both ends of the adoption process.

Opportunity Wced Past Papers Grade 11 File Type Pdf Pdf: If physical activity or the lack of it is your major concern, enroll your child for some dancing classes. If organized sports are impossible to get, try to enroll her in a gym. She may find friends there and may take to the treadmill.

Your child does not necessarily have to be a part of an organized group to benefit from after-school activities. There are various avenues open in front of you. Roping in the enthusiasm of your children in daily household activities like cooking, cleaning etc can also provide them with a refreshing extracurricular experience. Moreover, it will improve family ties too.

Art-based activities

A recent report by several independent researchers concludes that participating in the arts nurtures the development of social, personal and cognitive skills. Programs based on Arts can improve academic achievement and decrease the tendency towards delinquency. It helps youth form positive attitudes about themselves and build self-esteem.

Miracle Wced Past Papers Grade 11 File Type Pdf Pdf: Due to this vulnerable situation, many cardholders decide to purchase a membership to an air ambulance service that will cover any fees associated with getting the patient home. Such a company will charge a set fee, typically charged monthly or annually. For this fee, the covered person or family can choose to fly via air ambulance from any hospital far from home to the hospital of their choice. All of this is at no additional cost. Since such a flight home on a medically staffed air ambulance is expensive, this membership can save a great deal of money. One trip on an air ambulance can cost between \$10 and \$75,000.

Even a premium credit card won't cover those expenses.

Before traveling away from home, it is crucial that you learn the ins and outs of your coverage from a credit card. Even premium credit cards with fabulous benefits may leave you open and vulnerable in a medical emergency. All credit card agreements vary, so read the fine print very carefully.

If you are not guaranteed coverage of a flight home on a medically staffed air ambulance to the hospital of your choice, then you are not adequately covered with your credit card. Additional coverage is necessary to protect yourself, your family, and your wallet.

One of the best ways to get accurate quotes for air ambulance transport is by letting the companies fight for your business. Certain websites will allow customers to input the pertinent travel and medical information and let the companies send in their prices. From the comfort of your home, you can peruse the information at your leisure. Based on the price quotes from the air ambulance transport companies, you can then do a little more research on the organization to find the one that is right for you.

When comparing price quotes from air ambulance transportation service companies, make certain that you are comparing apples to apples and not apples to oranges. Find out what is included in each price quote. Does the air ambulance fee cover any and all ground transportation to and from the aircraft? Are family members permitted to fly in the air ambulance with the patient? If so, is this fee part of the price quote?

Another important factor to consider during this process is the type of medical care the patient will receive during the flight. Learn what type of staff will be on board the aircraft. Are there additional fees for specialized services such as a respiratory therapist or NICU team?

There are various symptoms of strain and sprain depending on each teen's physical condition and they may vary accordingly. One of the symptoms includes pain in and around the area injury. There could also be a swelling around the injured area. Some teens also experience difficulty when they use or move the area of the body that is injured. Some teenagers also undergo bruises or redness in the area that is injured. Many times the symptoms of sprains and strains may look similar to other medical conditions and a doctor's advice is the best option in this scenario.

Depending on various factors the treatment of sprains and strains will be prescribed by the teenager's physician that include teenager's age, overall health of the teenager, and medical history of the adolescent. To what extent the teen is injured is also a factor in determining the nature of treatment. A teenager's level of tolerance to certain medications, therapies and procedures is also taken into consideration before opting for a particular method of treatment. The treatment also depends of what expectations one has and also preference and opinion. Various options available for treatment include things like restriction of the activity after the injury, application of cast/splint on the injured spot, crutches or wheelchair, physical therapy which involves stretching exercises to give strength to the muscles, tendons and ligaments that are injured and last but not the least is the surgery which is opted for in worst case scenario.

Story of" Wced Past Papers Grade 11 File Type Pdf Pdf-Periodontal disease can be diagnosed by a dentist or a periodontist after reviewing the complete medical history and also physical examination of the teenager's mouth. Usually x-ray of the teeth is taken to evaluate the disease. Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as "gingivitis" in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist's treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis.

Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periodontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth.

There are various treatments available for periodontal disease which is decided by the dentist depending on teenager's age, medical history and health in general. The method of treatment also depends on the extent to which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration. Expectations and opinion of the parents or teenager is also the criteria in deciding the type of treatment. The treatment usually involves plaque removal, medication and in worse cases a surgery.

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so

that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.
